### *Transparency of Information*

**How will assessment results be shared with all members of the department? With other departments and school at large? With the public? Consider this description of excellence:**

*Assessment results are disseminated to appropriate audiences at appropriate times; data appropriate to external audiences are available in easily accessible public domains; data needed for internal decision making is readily accessible to decision makers.*

### *Practice of Assessment*

**Who was involved in assessing the department's SLOs this year? Just the chair? Committee? All faculty? Consider this description of excellence:**

*All members of the university community are involved in assessment activities in their respective units. Institution leaders frequently articulate assessment as an important value/activity of the institution.*

### *Process of Assessment*

**Did you evaluate anything related to *how* you do assessment? Examples: Student learning outcomes, definitions of success, people involved, how often and when each learning outcome is evaluated, etc. If so, what did you evaluate, why, what were the conclusions, and explain any changes along with a timeline.**
